

## Front-End Developer

ReadySet is a company on a mission to supply extraordinary technology that empowers our customers through accelerated retail innovation and success. We create software solutions through cloud-based web, VR, and emerging technologies. We are passionate about creating cutting-edge Virtual Reality experiences and helping our customers find a better, faster way to design, test, and implement retail solutions.

## Responsibilities

As a front-end developer at ReadySet, you'll build and test the front end of ReadySet's web application. You will work closely with other developers and designers to develop user interfaces. You should have a keen eye for detail and a strong sense of code integrity and organization. As a front-end developer, you not only develop new functionality to meet requirements, but you will also ensure solutions follow ReadySet's brand standards for intuitive, accessible, and well-designed user experiences. You will need to have a solid understanding of component-based development, responsive and semantic design, and experience defining and driving our front-end/web UI architecture. ReadySet's developers are committed to continuously learning and aren't afraid of solving a challenging problem with self-motivation and determination.

Our ideal candidate excels at all aspects of front-end development, with a clear proficiency in the React framework as well as HTML, CSS, JavaScript, ES6, TypeScript and is just as comfortable making something aesthetically pleasing as they are building out full-blown, highly interactive front-end applications.

## Qualifications

- 3+ years of experience working on production applications.
- 2+ years of experience with React.
- Well-versed in HTML, CSS, JavaScript/ES6/TypeScript.
- Ability to translate wireframes and high-level designs into semantic, accessible front-end interfaces of complex web applications, as well as develop reusable UI components.
- Experience with Figma, Sketch, Illustrator, or similar tools to translate flat mockups/prototypes.
- Experience with command-line utilities, build tools - NPM, Yarn, Webpack, Grunt, Gulp.
- Basic experience with Git.
- Experience with state management and asynchronous requests using Redux Toolkit.

### *Bonus points for:*

- Experience with WebGL, Canvas/HTML5 SVG Experience, three.js and/or AntDesign UI Library

## Next Steps to Apply

Submit the following to ReadySet Human Resource Director, Carrie Mueller: [carriem@readyssetvr.com](mailto:carriem@readyssetvr.com)

- Cover Letter introducing yourself. In cover letter please explain why this position is a fit for you and any expectations you seek.
- Must include Resume or CV.
