

Full-Stack Developer

ReadySet is a company on a mission to supply extraordinary technology that empowers our customers through accelerated retail innovation and success. We create software solutions through cloud-based web, VR, and emerging technologies. We are passionate about creating cutting-edge Virtual Reality experiences and helping our customers find a better, faster way to design, test, and implement retail solutions.

Responsibilities

As a full-stack developer at ReadySet, you'll build and test ReadySet's web applications. You will work closely with other developers and designers to develop and implement solutions that meet requirements and benefit our customers. You should have a keen eye for detail and a strong sense of code integrity and organization. You will need to have a solid understanding of component-based development, responsive and semantic design, and experience with web application technologies. ReadySet's developers are committed to continuously learning and aren't afraid of solving a challenging problem with self-motivation and determination.

Qualifications

- 4+ years of experience building production applications.
- Solid experience with front-end, user-facing web development using a modern framework such as React, Vue, Angular, etc.
- Experience building back-end REST endpoints with PHP or a similar language with a SQL data store.
- Experience with state management and asynchronous requests using Redux Toolkit.
- Solid JavaScript/Typescript, HTML and CSS skills creating responsive designs.
- Solid experience with Linux (or a derivative) command line and basic Linux server administration.
- Experience working in a team using Git or another SVCS, providing code reviews and coordinating with other developers.
- Quick and self-motivated learner who is comfortable working in a team environment as well as independently.

Bonus points for:

- Experience developing and maintaining cloud-native applications (we use AWS).
- Experience with our tech stack (PHP/Laravel, MySQL/Aurora, React, AWS, etc.).
- Experience leading developers and/or projects.
- Experience with AntDesign UI Library.
- Experience with Three.js.
